Announcement
- Update of Prospectus
- Introduction of Circuit Breaker Mechanism

The Manager of W.I.S.E. – SSE 50 China Tracker[®] (the “**Sub-Fund**”) hereby announces that the Prospectus of the Sub-Fund will be updated to incorporate additional disclosure as a result of the introduction of the index circuit breaker mechanism (“**Circuit Breaker**”).

On 4 December 2015, as approved by the China Securities Regulatory Commission, the Shanghai Stock Exchange (“SSE”), the Shenzhen Stock Exchange and the China Financial Futures Exchange officially issued the rules for the index Circuit Breaker, which will come into effect on 1 January 2016.

In summary, the new rules provide that, (i) when the CSI 300 Index rises or falls 5 per cent or more from its previous close for the first time in each direction during a trading day, the trading of A shares will be suspended for a period of 15 minutes. Trading will resume with a call auction after the 15-minute suspension. Unfilled orders placed before the circuit breaker was triggered will be carried forward, and market participants will be able to place and cancel new orders during the suspension; and (ii) when the CSI

It does not mean the Sub-Fund is suitable for all investors nor is it an endorsement of its suitability for any particular investor or class of investors.

300 Index rises or falls 7 per cent or more from its previous close for the first time during a trading day, the trading of A shares will be suspended for the rest of the trading day. In the event of a Creation Application, the trading halts may cause delay in the Manager acquiring the relevant securities for the Creation Application. Since the Sub-Fund would have received the cash for the Creation Application pending all relevant securities being acquired, this may result in greater tracking error. Also, the trading halts may cause delay in disposing of the requisite A Shares and the payment of redemption proceeds in respect of a Redemption Application.
