(Stock Code: 03182)

IMPORTANT NOTES:

- Investment involves risks and W.I.S.E. – Nasdaq Overseas China New Economy Companies Top 50 Index Tracker (the "Fund") may not be suitable for everyone. Past performance is not indicative of future performance. The Fund is subject to market and exchange rate fluctuations and to the risks inherent in all investments. Price of Units and the income (if any) generated from the Fund may go down as well as up. Investors could face no returns and/or suffer significant loss related to the investments. There is no guarantee in respect of repayment of principal.
- The key risks to which the Fund is subject to include: general investment risk, currency risk, concentration/People's Republic of China ("PRC") market risk/emerging market risk, passive investment risk, tracking error risk, trading risk, American Depositary Receipts ("ADRs") risk, trading differences risks, equity market risk, termination risk, reliance on market maker risks and risk in relation to distribution.
- The Manager will normally make distributions out of net income received or receivable by the Fund. However, in the event that the net income is insufficient to pay the distributions that it declares, the Manager may also, in its absolute discretion, determine that distributions be paid out of the capital of the Fund, or the Manager may, in its discretion, pay distributions out of its gross income while charging/paying all or part of its fees and expenses to/out of the capital of the Fund, resulting in an increase in distributable income for the payment of distributions by the Fund and therefore, the Fund may effectively pay distributions out of capital. This may reduce the capital that the Fund has available for investment in future and may constrain capital growth.
- Investors should be aware that in circumstances where distributions are paid out of capital or effectively out of capital, this amounts to a return or withdrawal of part of the amount investors originally invested or from any capital gains attributable to that original investment. Any distributions involving payment of distributions out of capital or payment of distributions effectively out of capital (as the case may be) may result in an immediate decrease in the Net Asset Value per Unit.
- Please refer to the offering document of the Fund for further details including investment objectives and policies, charges and expenses, risk factors, and the arrangement in the event that the Fund is delisted, before making any investment decision.
